ABSTRACT

The Directory of Open Access Journals (DOAJ) listed open access scientific and scholarly journals, that meet high quality standards by exercising peer-review or editorial quality control and are free to all from the time of publication based on the Budapest Open Access Initiative. Total 105 free online journals on Zoology were accessed through DOAJ and analyzed based on Country, Languages, Subject Headings, keywords, their accessibility and availability of Archives of online journals in Zoology. 9183 journals 4685 journals searchable at article level 119 Countries 1083902 articles 2013-05-12 DOAJ celebrates 10 years at the heart of Open Access 2013-05-02 DOAJ sponsors Accelerating Science Award Program 2013-03-12 DOAJ hits the 1 MILLION mark!

INTRODUCTION

The proliferation of freely accessible online journals, the development of subject specific pre- and e-print archives and collections of learning objects provides a very valuable supplement of scientific knowledge to the existing types of published scientific information (books, journals, databases etc.). However these valuable collections are difficult to overview and integrate in the library and information services provided by libraries for their user constituency. Open access journals as journals that use a funding model that does not charge readers or their institutions for access (Budapest Open Access Initiative, 2013).

Open Access Journals

Open access means users can read, download, copy, distribute, print, search or link to the full texts of these articles. Open access journals are scholarly journals that are available online to the reader "without financial, legal or technical barriers other than those inseparable from gaining access to the internet itself". Open access journals (gold road to

open access) and self archiving (green road to open access) are the two general methods. The publisher of an open access journal is known as an "open access publisher" and the process "open access publishing" (Ghosh et al., 2007)

DOAJ (Directory of Open Access Journals)

The idea of creating a comprehensive directory of Open Access Journals was discussed in the First Nordic Conference on Scholarly Communication at Lund/Copenhagen (<http://www.lub.lu.se/ncsc2002>) (Jeffery, 2006)¹⁰. The conclusion was that it would be a valuable service for the global research and education community. Available technologies make it possible to collect and organize these resources in a way that allow libraries worldwide to integrate these resources in existing services thus offering added value both for the service providers of these resources and for the global research and education community (Highwire, Stanford University, 2013)⁸. Directory of Open Access Journals is a service that provides access to quality controlled Open Access Journals. The Directory aims to be comprehensive and cover all open access scientific and scholarly journals that use an

appropriate quality control system and it will not be limited to particular languages or subject areas. Directory of Open Access Journals is hosted, maintained and partly funded by Lund University Libraries Head Office. DOAJ is receiving funding from (DOAJ, 2013).

OBJECTIVES OF THE PAPER

- To enumerate the Free E-journals on zoology on DOAJ.
- To know the country wise distribution of E-journals on Zoology on DOAJ.
- To find out the Language wise distribution of E-journals on Zoology on DOAJ.
- To know the accessibility of Archives of E-journals on Zoology on DOAJ.
- To know the usefulness and applicability of Zoology E-journals to other disciplines

MATERIALS AND METHODS

DOAJ (Directory of Open Access Journals) website (<http://www.doaj.org>) is browsed for the

present paper. Zoology e-journals were searched out and 105 journals were found on DOAJ. Total 105 Zoology e-journals were analyzed based on Country, Language, Subject Heading and accessibility of Archive of e-journal (OAL, 2007).

LIMITATION OF THE STUDY

The study is limited to Zoology E-journals which is listed on Directory of Open Access Journal. For the present paper DOAJ data is accessible 20/01/2013. It is not possible to show all the online journals access so access of only one e-journal's full text article is shown at last as a screen snapshot.

DATA ANALYSIS AND INTERPRETATIONS

Total 105 Zoology E-journals were analyzed based on Country wise, Languages, Subject Headings and accessibility of Archives of E-journals. The list of journals is annexured in supplementary table: 1 which enumerates the free online journals on Zoology along with their URL so that any user can browse the e-journals directly by entering the URL in its address bar.

The screenshot displays the DOAJ website interface within a Mozilla Firefox browser window. The page features a navigation menu on the left with options like Search, Browse, Suggest a journal, About, Support DOAJ, Statistics, and Contact. The main content area is divided into 'Journals' and 'Articles' sections, each with search input fields and buttons. A 'NEWS' sidebar on the right lists recent updates, such as '15/9 2011: 7000 journals and the DOAJ site in Turkish' and '27/6 2011: Article about OA publishing'. At the bottom, a 'DOAJ AS OF TODAY' section provides statistics: 7097 journals, 3268 journals searchable at article level, and 639626 articles. The browser's taskbar at the bottom shows various open applications and the system clock at 4:45 PM.

Snapshot of DOAJ

Table 1: Analysis of Country wise Distribution of E-Journals on Zoology

Sr. No.	Place of Publication	No. of E-Journals	Rank
1	Argentina	2	7
2	Bolivia	1	8

34	United Kingdom	3	6
35	United States	12	1
36	Uruguay	1	8
37	Venezuela	2	7
	Total	105	

Table 1 depicts the country wise distribution of E-journals on Zoology on DOAJ. United States was in 1st rank due to publication of 12 e-journal followed by Brazil.

Table 2: Analysis of Language wise Distribution of E-Journals on Zoology

S.N.	Languages	No. of E-journals	Rank
1	Bulgarian	01	9
2	Catalan	03	7
3	Chinese	03	7
4	Croatian	01	9
5	Czech	01	9
6	English	105	1
7	French	09	4
8	German	05	5
9	Italian	04	6
10	Japanese	01	9
11	Portuguese	12	3
12	Russian	02	8
13	Slovak	01	9
14	Spanish	26	2
	Total	174	

Table 2 gives the information about the publication language of the E-journals on Zoology. English is the most common communication language to spread the knowledge in all over the world which is used by all 105 E-journals. Out of 105 e-journals on Zoology 26 E-journals is published in Spanish language, 12 published in Portuguese language which was 3rd rank in table. (See supplementary Table in Annexured 2, Available Online)

Table.3.a shows the interdisciplinary scope of the online-journals of Zoology. Zoology E-journals can also be used in, Microbiology, Medicine, Genetics, and Physiology Sciences.

Screen snapshot of Open Access Journal (Biotechnology and Molecular Biology Review)
FINDINGS

- It is observed that United States was in 1st rank due to publication of 12 e-journal followed by Brazil.
- English is the most common communication language to spread the knowledge in all over the world which is used by all 105 E-journals. Out of 105 e-journals on Zoology 26 E-journals is

published in Spanish language, 12 published in Portuguese language which was 3rd rank in table.

- It is observed that Zoology E-journals are interdisciplinary in nature. Out of 105 E-journals, 84 e-journals are useful for purely for Zoology as core subject but Zoology journals can also be useful for Biology, Agriculture, Medicine, Earth Sciences, Ecology, Oceanography, Aquaculture

and Fisheries, Animal Sciences and Therapeutics' research scholars and scientists .

- All of e-journals archives are accessible from year of starting the Journal.

CONCLUSION

DOAJ is comprehensive and cover all open access scientific and scholarly journals that use an appropriate quality control system, and it will not be limited to particular languages or subject areas. DOAJ is to increase the visibility and ease of use of open access scientific and scholarly journals thereby promoting their increased usage and impact. Research scholars, Scientists, Professionals should browse the DOAJ site and access the free online journals on their Subject areas. It is also suggested that Scientists and Research Scholars should publish their research work in online open access journals for wider visibility of their research work and for greater impact factor and citation index (Jeffery, 2013).
