ABSTRACT

Developed India 2047 is an ambitious vision of the Government of India, which aims to make India developed and self-reliant. The Developed India vision is not limited to a single aspect or dimension; it encompasses various dimensions. This vision defines issues such as economic development, environmental awareness, healthcare, education, employment, industry, agriculture, technological and scientific progress, etc. in the context of the nation. By 2047, when India completes 100 years of independence, we will see our country moving on the path of prosperity and sustainable progress. The Developed India 2047 vision focuses on several ambitious plans and goals, while embracing our country's glorious culture and history. The vision aims to empower the country internally and externally, enabling it to face future challenges and obstacles with a strong will. By 2047, our country will be able to play a leading role in the world alongside developed countries. The objective of this vision is to provide equal opportunities to all citizens by improving the standard of living of Indians. The dream of a developed India symbolizes the hopes of every citizen. The country's successful Prime Minister, Shri Narendra Modi, believes that this is India's golden age. According to him, if we want to take our country on the path of development, we will have to make continuous efforts so that our country can maintain a steady direction of progress by 2047 and become a global power.

Keywords: development, equal opportunity, self-reliance, standard of living, sustainable development.

1. INTRODUCTION

India's Historical Background:

India has an ancient and historic heritage. India's ancient history has been glorious and proud. This period is considered India's golden age. At that time, India was considered the world leader. The Vedic period was a period of spiritual advancement, great progress, and cultural prosperity. During this period, various Vedas and Upanishads were created.

Knowledge, science, and mathematics flourished during the Vedic period. Medical science was also in a developed state. India was also a great center of education. Universities like Nalanda and Takshashila were world-renowned and were a center of attraction for foreigners. Trade and commerce were also progressive in ancient India. Agriculture and animal husbandry also improved the standard of living. Natural resources and resources were making India a golden bird. This period was a glorious period for India.

Developed India 2047 and the Concept of Sustainable Development:

The concept of Developed India 2047, announced by the Government of India, aims to achieve India's sustainable development. The concept of sustainable development is a concept related to human development. The goal of sustainable development is to meet the needs of the current generation as well as future generations. This means that when a country becomes self-reliant and capable enough to ensure the availability of resources for both the current generation and future generations, it can be said to be on the path of sustainable development. Sustainable development is essential for long-term prosperity and progress. Environment, economy, and society are the three pillars of sustainable development. Eliminating inequalities, sustainably conserving natural resources and ecosystems, eliminating poverty, a clean and healthy environment, alternative sources of energy, quality education, economic development, employment-oriented systems, citizen security, and a high standard of living are the key objectives of sustainable development. Achieving these objectives and paving the way for India's development is the vision of Developed India 2047.

Developed India 2047 Introduction and Goals:

The Developed India concept is an ambitious plan announced by the Government of India and NITI Aayog, which aims to make India a developed nation by 2047, following the path suggested by the NITI Aayog. NITI Aayog was tasked with developing a comprehensive document based on 10 sectoral themes and perspectives, which outlined the concept of building a developed India. This concept presents a vision for the future that will lead India on the path of progress and development. A prosperous and developed India is its goal. Developed India is a key aspect of the Honorable Prime Minister's

Panch Pranava. This concept paves the way for the prosperity and well-being of the Indian people. The main pillars of a developed India are youth, farmers, women, and the poor. Its goal is to strengthen the infrastructure in the areas of education, health, energy, agriculture, technology, environment, economy, military, etc., and to increase access to the general public. Its primary objective is to strengthen India's social, economic, and cultural landscape, making it progressive and inclusive, and fostering sustainable development. Its mission is to connect Indians with quality education, improved healthcare, social inclusion, and advanced technological innovations, enabling our country to stand among the most powerful and developed nations by 2047 and play an effective role in shaping the direction and conditions of global progress. Social and cultural advancement, efficient and effective governance, economic upliftment, women's empowerment, environmental sustainability, and youth participation are key areas of Developed India 2047, focusing on which can position India as an effective player on the global stage. Thus, Developed India 2047 paves the way for development that places India among the developed nations from an economic, social, and environmental perspective.

The objectives of Developed India 2047 can be highlighted point by point:

1. To provide excellent world-class infrastructure and facilities in India's rural and urban areas.
2. Promote world-class models and innovation to boost indigenous industries.
3. Digitize systems to prevent unnecessary government interference so that the public can directly benefit from the economy and government policies.
4. Emphasize the use of indigenous technologies and tools for self-reliance in the space sector.
5. Connect youth with skill development and education and implement schemes to provide new employment opportunities.
6. Reduce carbon emissions and develop environmental policies by exploring new resources to increase energy levels and efficiency.
7. Empower India in the military and defense sectors.
8. Aim to accelerate India's economy and GDP growth to match that of developed countries.

Various Dimensions/Aspects of Developed India 2047:

Developed India 2047 has various dimensions or aspects. The Developed India Vision Document identifies various sectors to provide fundamental strength and fulfill the dream of a developed India by 2047. Keeping in mind its ancient and glorious history and cultural values, India has outlined various dimensions in Developed India 2047, which can be studied point by point:

Economic Prosperity and Development:

India is today one of the fastest-growing economies in the world. Programs like Atmanirbhar Bharat, Make in India, and Startup India have accelerated India's economic reforms, and employment opportunities have increased, along with increased self-reliance in the economic sector. India's GDP has increased rapidly in the last 10 years, and according to various economic estimates, India could become the world's third economic power in the next 30 years. India aims to achieve a GDP of 1.5 billion by 2047. The GDP is to be increased from \$3.4 trillion to \$30 trillion. This will include various industries in India, including manufacturing and agriculture. The government will promote several policies to encourage industry, leading the country towards economic progress.

Education and Healthcare:

By 2047, India will be a leader in education and healthcare. By adopting the New Education Policy 2020, India will achieve revolutionary results in the field of education. India's education will be innovative, technological, and employment-oriented. Its aim is to increase students' interest in quality education and research. The goal is to increase women's participation in education and to provide education to all underprivileged sections by 2047. By expanding health and medical services, every individual will be connected to health schemes. The Ayushman Bharat Yojana and the Pradhan Mantri Jan Aushadhi Yojana are important central government schemes aimed at providing affordable access to quality medicines to the common man. India is committed to expanding accessible and excellent healthcare services to all citizens by 2047.

Social Reforms and Quality of Life:

Developed India aims to give every citizen the right to a dignified life. The Indian government has enacted numerous policies to eliminate discrimination,

unemployment, and poverty, aiming to improve the quality of life. Developed India 2047 outlines a roadmap for the development of India's urban areas, as well as rural and backward regions. This policy aims to eliminate discrimination and bring equality. This will enable India to become a global power and accelerate economic and social development.

Industrial and Infrastructure Development:

Development of industrial and infrastructure is another goal for India. India aims to invest in roads, railways, uninterrupted power supply, and high-speed internet connectivity.

Security Sector Improvements: India's key goal is to strengthen its military and security sectors. Rafale, Sukhoi, and Agni are included in India's defense system. The Analashta system is a future project under development. The Agni path project is an ambitious plan for India. India's objective is to strengthen India's borders.

Technological and Technological Advancement:

India's goal is to advance scientific technology and advance India's position. India has achieved significant achievements in digital transactions, biotechnology, space research, and IT. India's goal is to develop new techniques and technologies alongside scientific research, enabling India to achieve various scientific achievements. Missions like Chandrayaan, the Mars Mission, and Aditya L-1 have brought India pride. Indian Space Research Organization (ISRO) is playing a vital role in achieving space goals. India aims to become a space superpower by 2047. The Indian Army successfully tested the landing of the fully indigenous portable hospital, Bhishma. AI technology is now being used in surgery.

Advanced Transportation and Transport Systems:

Developed India 2047 aims to facilitate transportation and ease of use. The operation of metro trains reflects India's progressive nature. The Vande Bharat train is a high-speed and comfortable train, the operation of which India plans to expand. Work on the Bullet Train project is also progressing rapidly, which will further develop India's transportation system. The increased use of electric vehicles will also make transportation in India more accessible. India is also aiming to make road and air travel more accessible.

Environmental Management and Conservation:

Environmental conservation and management is a key objective of Developed India. Purifying the environment by reusing old, unused materials through recycling management is a long-term vision. A healthy environment, a green India, clean energy initiatives, and a pollution-free India are future goals.

India's Role on the Global Stage:

India is a country with geographical, cultural, and economic potential. Its diverse culture gives it a unique significance. Since independence, India has progressed towards continuous development. Overcoming various challenges and obstacles, India has steadily established itself among the progressive nations. Over the past few years, India has achieved many significant milestones. India has consistently championed the improvement of its citizens' quality of life by initiating timely, positive changes to its infrastructure across various sectors. By offering higher education, improved healthcare, and better employment options, it has earned a respected position globally. India has established a unique international identity through its capable leadership. Determined to achieve its goals, India is scaling new heights of development. India's remarkable achievements in economic progress, technology and research, space exploration, and military and defense sectors have astonished the world. Due to its unique diplomacy and international policies, India stands at the forefront of the world's superpowers. Today, India is an emerging global power, and many nations are eager to welcome it with open arms. Important Suggestions for a Developed India: Developed India 2047 paves a path for our country, allowing it to steadily progress on the path of development. India holds endless potential for development. India's vast geographical area and cultural diversity make it unique in the world. Its economic sector, vast market, and labor system easily attract investment from other countries. If India is to achieve the goals of Developed India 2047, the following suggestions can be highlighted:

Advancement in Education and Healthcare:

India has been a hub of education since ancient times. In ancient India, women, along with men, played a significant role in the education sector. Both were the pillars of education. Famous universities like Nalanda were home to

great teachers. Education had a glorious tradition. To achieve that same level of education, education must be made accessible to all, fulfilling the dream of a developed India.

Strengthening the Economic and Trade Sectors:

India enjoyed a flourishing trade in ancient times. Trade in silk, sugar, cotton, precious stones, and spices was also prevalent. Indian trade was reliable and the economic situation strong. To achieve a developed India, we must develop the Indian economic and trade system.

Skill Development and Employment:

If India is to achieve development and self-reliance by 2047, it must also work to connect people with skills and employment. A policy must be formulated to enable people to acquire skills and obtain employment.

Corruption-Free System:

The biggest challenge in realizing the dream of a developed India is corruption. Corruption hinders a country's progress. Therefore, the foundation of a self-reliant India can be laid only by eradicating corruption from its roots.

Environmental Protection: A clean environment is a primary need of the people. By formulating a policy for environmental protection, we can provide a healthy environment to the people. A clean environment is the main foundation of a developed India; by protecting it, the foundation of a developed India can be laid.

Social Equality:

Social equality is essential for the concept of a developed country. Any kind of discrimination in a society can derail that society from its path of progress. Therefore, an inclusive society is the foundation of a developed India.

CONCLUSION

The resolution of Developed India 2047 envisions an India that will progress toward sustainable development, self-reliance, and good governance. Every citizen will enjoy equal rights and a high standard of living. Medical and healthcare services will be high-quality, accessible, and affordable. Equal employment opportunities and employment options will be available. Higher education

will be provided to all classes and women with equal rights. The use of technology, technological innovation, and digital development will be promoted. The goal of Developed India is to establish India among developed countries on social, economic, and environmental grounds. Our country will embark on the path to prosperity by connecting with ancient values, culture, and pride. If all Indians pledge to actively participate, India will undoubtedly become a developed nation by 2047, the 100th year of independence, playing a significant role in the global landscape.
